Subject Rt 7 Dump/NJ Fireworks DAS R31878

The sample request for this site may be processed.

Please note: Pat Sosinski email the following concern about the soil samples.

"A sample matrix of "solid" from a site named "Rt. 7 Dump/NJ Fireworks" makes me wonder if the solid materials could be impact sensitive. If the AT makes a successful offer for these samples, could the particle size reduction be safely accomplished? CST, could you please try to get more specific information on the nature of the solid samples?"

I spoke with Patti Davis (MDE) about Pat's concern. She said they have not been to the site, so do not know the nature of the soils.
